

Salesforce Configuration Model-2.2.4 Assignment

7. Flow Orchestration

Create a Flow Orchestration to automate on-boarding of a new Employee in a company.

- a. When a new employee has joined the company, send them a welcome email mentioning their name, employee code and department.
- b. If the 'Assign Laptop' checkbox is true, they should be assigned a laptop.
- c. Add an interactive step for one of the IT admins to only see their information and assign them a device by adding the device code in a field.
- d. Add an interactive step for the employee's owner to confirm if their device has been set up or not.
- e. If the answer for above question is yes, create a task to signify that the employee's onboarding has been completed.
- f. If the answer for above question is no, steps b to e should be repeated.

(Create any objects or fields required for above question)
